SWAROVSKI

Trust the Original

Swarovski was the first company to recognize zirconia's full potential and expanded its expertise in precision cutting to the manufacture and supply of machine-cut zirconia already in 1976 – a first for the international jewelry industry.

Following its pioneering spirit, Swarovski started to set the industry standards for product quality, reliability, innovations, and corporate social responsibility, as well as trend and design initiatives.

BEING PIONEERS IS
IN OUR DNA.

What is Zirconia?

Zirconia is an artificially produced crystalline imitation of a diamond made of Zirconiumoxide, which is very hard and is characterized by a light refraction that is close to that of a diamond.

Zirconia is also called Cubic Zirconia (CZ) and it is considered the best diamond imitation because it has a crystalline structure like diamonds.

Zirconia can withstand very high temperatures (2750°C) and can therefore be set like a diamond.

Zirconia can be applied to jewelry without the need for adhesives, making it extremely durable and ideal for everyday wear.

COMPARATIVE ANALYSIS

To demonstrate the supreme optical quality of zirconia, the following table compares our created stones with their natural counterparts.

Material	Zirconia	Diamond	White Topaz	Crystal
Refractive index	2.2	2.42	1.62	1.52 - 1.58
Dispersion (CF)	0.065	0.044	0.014	0.009 - 0.098
Hardness (Mohs)	8.5	10.0	8.0	5.0 - 6.0
Specific Gravity	5.6	3.53	3.54	2.7 - 3.3

What Makes Swarovski Zirconia so Unique?

For the first time in history, Swarovski has applied ideal diamond-cut standards to zirconia.

Swarovski's Pure Brilliance Cut makes Swarovski Zirconia the finest diamond simulant on the market. The Round Pure Brilliance Cut offers the same brightness as a Tolkowsky ideal cut, recognized as the world's most perfect diamond cut. It is indeed the only zirconia to be cut in accordance with the cutting parameters stated by the GIA as being ideal for diamonds.

THE PROOF OF QUALITY

Every single stone is marked with a microscopic engraving that is completely invisible to the naked eye: "Swarovski Zirconia". The laser-engraved quality seal serves as your assurance that you are acquiring stones of highest precision and brilliance meeting the cutting standards of the high-quality diamond industry.

Packaging and Labeling

We take great care and pride in the handling and packaging of our exclusive products. The individual construction of our packaging allows for stacking, while the unique see-through design enables quick and easy identification of the contents. As a guarantee of quality and security, a special seal ensures that your Swarovski product is both original and intact.

BAR CODING

To guarantee the quality of our products, and to help trace the history of an order, each of our packages is tagged with a unique bar code label.

TRUSTSEAL

Our specially created Trustseal secures each product package and verifies the authenticity of our Swarovski Genuine Gemstones and Created Stones. The complex design of the seal is similar to a hologram, making it virtually impossible to imitate.

SAFETY TAB

Our strict manufacturing standards call for dependable security solutions. In order to protect our packages from tampering, we have developed the Safety Tab – an important new security feature, which is applied at the final stage of packaging.

Once broken, the Safety Tabs cannot be reused, giving the customer a clear indication that the package has been tampered with. Should any of our packages be delivered damaged or with broken Safety Tabs, we kindly ask our customers to report the incident to their local sales office as soon as possible. The superior quality of our genuine Swarovski products can only be guaranteed when the Safety Tabs are fully intact. In order to open the packaging, please move the Safety Tabs in the direction of the arrow.

Swarovski Zirconia is a Conscious Choice

We believe everyone can make a conscious choice to look after our world. That's why Swarovski is driven by the pioneering principles of equity laid out by our founder, Daniel Swarovski. Because no one should have to choose between responsibility and luxury.

Swarovski Zirconia, the first of its kind on the market, is widely acknowledged as the highest quality, most precisely cut zirconia available and it is also the most responsible. We create this innovative stone at our best-in-class production facilities in Austria and Thailand, where we are committed to industry-leading environmental, safety and labor standards. As such, these Swarovski-owned centers are certified by the Responsible Jewellery Council and audited using the globally recognized SMETA standard.

The myriad vibrant colors of our zirconia are achieved thanks to our own, patented and environmentally friendly process, never through irradiation. In fact, we proudly guarantee that all Swarovski Zirconia is free from harmful substances. This is monitored through a stringent program that surpasses the strictest laws worldwide.

While Swarovski Zirconia is a man-made product, we use a variety of natural raw materials to produce it. Because we operate a tightly controlled, transparent supply chain, we are able to visit our suppliers and ensure they meet our exacting benchmarks for human rights and environmental stewardship. Indeed, we are proud to be able to trace every individual stone back to the original source of its materials – the laser engraving on each shining stone is our customer's and consumer's proof of its responsible provenance.

By choosing Swarovski Zirconia, you are making an active choice to respect people and our planet.

Swarovski Zirconia Colors

White

Color plays a fundamental role in Swarovski's company history and is a constant source of creative inspiration. Thanks to our detailed research and creative expertise, we continually develop exciting new colors.

SWAROVSKI ZIRCONIA TCF™ COLORS

- Thermal Color Fusion (TCF™) is a patented innovative coloration technology that enhances the surface of the stone with an enduring hard-ceramic layer on the pavilion.
- TCF™ enables the enhancement and transformation of zirconia with an array of fashion-forward colors.
- Patented in Austria.
- TCF™ is a special chemical heat treatment that is durable, permanent and resistant.
- TCF™ is able to sustain production processes (cast-in-place) and cleaning methods.
- As the coloration is restricted to the near-surface of the stone, the body of the stone remains completely unchanged.
- Our TCF™ technology does not involve any kind of irradiation and therefore is environmentally and consumer friendly.
- TCF™ has a high color consistency regardless of the size and shape of the stone.

Swarovski Zirconia Vibrance Family

We aspire to innovate in a way that seamlessly blends past, present, and future. The Vibrance color family is a first of its kind color development in Swarovski Zirconia, a unique combination of two colors in a single stone. Swarovski's patented TCF™ coloring process results in pure, consistent shades from the smallest to the largest stone. Each stone of the Vibrance Family produces a fascinating color effect akin to looking through

a kaleidoscope. Whichever way you look at it, every way you metaphorically 'turn the kaleidoscope' it creates fresh new perspectives. Above all, these constantly changing patterns and hues illustrate how each person and each life is unique, and every special moment deserves to be celebrated. It is both a jewel of a moment and a moment for memorable jewelry that will be admired and deeply treasured for years to come.

Casting-in-place **

14 KT Gold and 925 Silver
Casting temperature 1030°C
Wax burnout: 2 hours at 700°C

Soldering up (AG) & Electroplating
Soldering agent: Silver soft agent
(925/000) Soldering Flux: Fluron
Soldering temperature ~700°C

Blackened Silver 1/3 K₂CO₃, 1/3 Sel,
1/3 H₂O stones exposed to filtrate for 3
minutes at 50°C; rinsed with H₂O

Gold coloring
Color bath mix of 17.3% NaCl,
23% KNO₃ 22.6% H₂O,
25.6% HClconc Boiled in solution
for 3 min; rinsed with H₂O

Electroplating: For cleaning galvanic
process, please see "Alkaline Cleaning"
recommendations below.
pH value of electro cleaning bath
max. pH 12; temp. of bath 45°C constant
exposure time in bath max. 2 minutes

Sulfuric acid pickle, 20 Vol % H₂SO₄,
30 minutes at 60°C rinsed with H₂O

Vitrex pickle, 12.5 Vol % Natriumbisulfat;
10 minutes at 70°C rinsed with H₂O

Alkaline Cleaning
Max. pH 12, at max. 50°C,
max. exposure time 15 minutes
(total soaking time in all steps)

- no alteration recognizable
- parameters MUST be adhered to

* Polishing or extreme scratching of the pavilion might cause a change in the color appearance.

** Casting-in-place tests were conducted with different silver and gold alloys.
